# SUNMI CLOUD

SUNMI

## SUNMI CLOUD

A mobile device management platform for SUNMI partners  
in customizing and managing their fleet of devices

A user-friendly platform  
**SUNMI CLOUD**

The SUNMI logo is located in the top right corner of the slide. It consists of the word "SUNMI" in a white, sans-serif font, centered within a solid orange square.

## Cloud Grey Distribution

Flexible selection of receiving devices and geographical distribution

Rapid online application on the premise of meeting customer demand, or trial use of new product among selected senior users in order to collect customer opinions, achieve further optimization, and reduce the scope of users affected by product updating

## Hardware Manager

Better determine the equipment conditions, and eliminate complicated

aftersales process

SUNMI Aid can gather equipment use data so that the developers can directly look over the use of their devices, including device location, accumulated printing distance, and 3G flow use. Better judgment about equipment conditions and elimination of complicated aftersales process can help to save your efforts.

A user-friendly platform  
**SUNMI CLOUD**

SUNMI

## Recovery Package

*Nip in the bud: to solve the crisis before it takes shape*

*Every device of SUNMI is equipped with quick recovery function so that the system can be operated even in case some uncontrollable situation arises.*

## Customized Service

*To enable the developers to better customer their business and make their brands stand out*

*Customized desktop, startup picture, pre-install APP, and default startup*

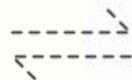

*APP  
Could customized your own App Store, in which third-party APP must undergo review when being put on or off. Your terminal customers are unable to install any third-party APP other than those available in your APP store. In this way, you can completely avoid your competitors Apps.*

# A user-friendly platform SUNMI CLOUD

SUNMI

## Remote Assistance

Through remote assistance function, you can manage all your SUNMI devices no matter where they are. Against efficient equipment maintenance function, aftersales service can never become a trouble.

1 smart devices that can be used either alone or in combination—Enjoy high efficiency
